ECO SYSTEM

DOGEFUN \$DFUN

Is a decentralised finance (DeFi) token on the Binance Smart Chain (BSC).

Unlike projects heavily dedicated to farming, liquidity pool acquisition, we aim to avoid messy pricey fluctuations as much as possible.

AUTOMATIC LIQUIDITY

The automatic liquidity function serves a two-pronged benefit.

As the contract collects tokenns from both buyers and sellers and send them to the Liquidity Pool, it nurtures a stable price floor. The second benefit of this transaction penalty is that it discourages arbitrage, supporting a healthier, safer and more vibrant volume for the holders.

If we think of the liquidity pool as the foundation that keeps the system "afloat", we can make a model comparison to burning functions, which only carry a short-term benefit from a supply decrease. Why Short Term? When whales tend to sell large positions or take profits. This is why the maximum amount each wallet holder can purchase is 1% of total supply. This function will allow holders to grow with stability and less fear of whales manipulating the charts.

DOGEFUN MEMES

We will be hosting a weekly meme contest & Gif Contest on Twitter and Telegram to airdrop the winners as part of incentives.

We strongly believe that with the current hype of dogecoin with Mcdonald's, Elon Musk. This will certainly create extra hype for social algorithms.

Winners will be rewarded in \$BNB

Why MOONSHOT?

Most projects are MOONSHOT but exaggerate as ECOSYSTEM. Meme projects are successful as moonshot with heavy marketing. I decided to team up with FUNBOY for DOGEFUN as i see a great potential in the ecosystem on the drawing board.
